Treatment: Practical (P)

Abstract: The integration of software tools into CIM environment is discussed under standardization of information modelling and communication point of view. A STEP (ISO10303) standard based platform for integration of applications, developed for the European BRITE/EURAM CIMTOFI project, is described. The integration of CAD systems and furniture design/evaluation into this platform is also presented. The communication protocol, available within the platform, is described. The current status of the work is presented, and the tendencies of evolution of the work are identified. The formation of an ISO Working Group on the definition of a **furniture design application** protocol is also discussed. (8 Refs)

Title: Systems furniture: the reconcilable differences

Author(s): Powers, D.

Journal: The Office vol.102, no.4 p.110-11

Publication Date: Oct. 1985 Country of Publication: USA

CODEN: OFISAD ISSN: 0030-0128

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G); Practical (P)

Abstract: The office furniture industry is coming up with designs to cost-effectively accommodate the needs of employees. A major emphasis is placed on providing the worker with ample space to do paperwork while also interfacing with data entry terminals and personal computers. For all the furniture styles and accessories being developed, the bottom line remains the same for all manufacturers of systems **furniture**. Neat and interesting **furniture designs** that meet the ergonomic, **electronic** and geometric needs of the end user must be offered. Separate data-processing atmospheres for clerical and middle management offices are clearly unnecessary today. With a little bit of effort, it is possible for the electronic office to be as advanced as its high-tech equipment suggests. And, over the next few years, the sophistication of the offerings and designs can only improve. (0 Refs)

Treatment: General, Review (G)

Abstract: Many advanced technologies in systems **furniture applications** and facility **design** are incorporated and showcased at the newly renovated and expanded headquarters of Westinghouse Furniture Systems, Grand Rapids, MI. A host of high-technology innovations customized for the facility and the unique applications of Westinghouse, together with a comprehensive range of integrated Westinghouse furniture subsystems, are synthesized into productive offices. A unique electronic visual communications/paging system, Viscom, enhances the accessibility of employees, while solving the problems of distracting audio paging. Also within the new Westinghouse facility is the Learning Center, featuring a 38-foot diameter revolving platform, which facilitates sales training and other educational/informational meetings. Other office technologies installed over the past few years at Westinghouse include electronic mail, word processing, personal computing, and facsimile copying. (0 Refs)

Treatment: Practical (P)

Abstract: The technology associated with distributed information processing is not easily absorbed into the general office environment. Distributed processing places novel demands on the environment through introducing radical new patterns of working, and modifying space lighting and cable requirements. Solutions have been sought not only in enhancements to equipment and the building fabric but also through the **application** of ergonomics to **furniture design**. Systems **furniture** can perform a variety of functions appropriate to the information technology user, but care is needed to avoid expensive mistakes. DP managers have a key role to play in the choice and application of systems furniture. (3 Refs)

Title: Modula-2: Pascal's powerful heir

Author(s): Brown, A.W.; Gleaves, R.E.

Author Affiliation: Volition Systems, Del Mar, CA, USA

Journal: Mini-Micro Systems vol.16, no.10 p.183-6

Publication Date: Sept. 1983 Country of Publication: USA

CODEN: MISYDF ISSN: 0364-9342

Language: English Document Type: Journal Paper (JP)

Treatment: New Developments (N); Practical (P)

Abstract: Modularity-the partitioning of structures into well-defined units-is a powerful **design** concept in everything from office **furniture** to distributed computing systems. In **designing** modular **software** systems, computer scientists have evolved the concepts of information hiding and encapsulation. Niklaus Wirth, the creator of Pascal, merged these concepts with Pascal's data and control structures to produce a new language called Modula-2. While preserving the general flavor of Pascal, Modula-2 includes features that address the need for modular design, low-level machine access and improved syntax and semantics. These features allow mini and microcomputer system programmers to write clear and efficient code without resorting to 'kludges' or language extensions. (0 Refs)

Virtual reality emerges from parametric technology

Bidner, Kevin;

Wood & Wood Products v. 103 no12 (Nov. '98) p. 43-4+

DOCUMENT TYPE: Feature Article ISSN: 0043-7662 LANGUAGE: English

RECORD STATUS: Corrected or revised record

ABSTRACT: The use of virtual reality in the **furniture** industry is considered. **Furniture design software** now uses data creation technologies to provide new graphics and smarter software, allowing errors to be corrected as they are made. The new software uses parametrics to create a virtual product, a software duplicate of every aspect of the product. Some of the benefits of Parametric and Object Oriented Technology are assessed.

Vendite al dettaglio in retromarcia

Italy: 0.9% drop in sales in November 2001

Il Sole 24 Ore (ISO) 26 Jan 2002

Language: ITALIAN

In November 2001, retail sales in Italy have gone up only by 1.5% on an annual basis, which, compared with the 2.4% inflation value, becomes a -0.9% drop. The same month, compared to the previous, shows a slight increase of 0.1% (Northern regions 1.7%, Southern 1.5% and Central 1.2%). In November 2001, some sectors performed quite well: food +1.8%; shoes +2%; household products +2.1%; and pharmaceuticals +3.8%. However, only a +0.2% increase was registered for computers and **electronic** goods and +0.6% for **furniture** and interior **design**. Large distributors had higher performance figures with +2.7% than small-sized enterprises than only went up by 1.3%. The highest growth was registered by hard discount stores (+5.8%), followed by supermarkets (+4.1). Generally, small enterprises had a very little increase of +0.6% (+1.4% in 2000), compared to medium +2% and large-size companies +2.7% (+4.5% in the previous year). For small businesses, the figures were below zero both in the food products (-1.5%) and in the non-food products (-0.7%) whilst big distributors increased in their performances. *

Invido-M6belfabrik von Kunden gesteuert

GERMANY: E-DESIGN, E-COMMERCE WITH FURNITURE

Holz-Zentralblatt (XGY) 08 Nov 2000 p.1862

Language: GERMAN

A newly established company called Invido which runs a furniture factory in east German Niederdorf is offering clients the opportunity to design their furniture themselves and send the order to the factory by internet. The company is giving away 4mn CD-ROMs with **furniture design software** in cooperation with computer and home magazines. The furniture is made to measure at the Invido factory, while delivery takes place by a specialist retailers, of which Invido aims to gain 100 as partners by the end of year 2000. It is said that due to industrial production, the prices of the tailor-made furniture are reasonable.

Nobel to attract foreign buyers via the Internet

SINGAPORE: NOBEL TO BUY STAKE IN DYNAMIC

The Straits Times (XBB) 02 Dec 1999 p.82

Language: ENGLISH

Singapore's Nobel Design Holdings, a firm that sells furniture and offers design services, will acquire 68% of an online furniture catalogue firm, Dynamic Furniture, for S\$ 170,000. The firm will spend S\$ 3 mn to develop the website and market it to retailers in America and Europe in March 2000. The website now offers 300 items and the amount will increase to 1,500-2,000 within two years. Nobel has an option to increase its stake in Dynamic Furniture to 80%, but is looking for another partner to invest S\$ 5-10 mn. The acquisition is part of Nobel's strategy to capitalise on the Internet to expand its markets. It hopes to get a quarter of its revenue from abroad, up from the present 10%. Nobel has just launched a website that sells direct to Singapore consumers. Both websites should contribute up to a fifth of its revenue for the present fiscal year.

Die Marke AEG liegt tief im Herzen der Deutschen
GERMANY: AEG SUCCESSFUL WITH DOMESTIC APPLIANCES
Frankfurter Allgemeine Zeitung (FA) 31 Aug 1999 p.30
Language: GERMAN

The German Nuremberg-based Electrolux subsidiary AEG HausgerUte GmbH is increasing its market share in the declining German market for domestic appliances. Due to weak export business, turnover will probably fall slightly in 1999. In 1998, turnover decreased by 1.9% to DM 2.14bn. AEG is aiming at a profit margin of 6% before tax and interest in 1999. Later on, profit margin could exceed 6.5%, according to chief executive Mauro Marcone. Mr Marcone expects total sales of large appliances to decrease in Germany by 1% in volume in 1999. Besides from restructuring measures, AEG HausgerUte GmbH profits from its good reputation among Germans. According to a GfK survey in April 1999, 34.6% of Germans prefer the AEG brand when choosing kitchen appliances. With this, AEG is in the first place followed by Siemens (33.6%), Miele (26.6%), Bosch (22.7%), Bauknecht (19.7%) and Neff (5.8%). According to GfK, AEG increased its market share in large appliances from 10.8% to 12.8% year-on-year in the spring of 1999, while the share of the market leader Bosch-Siemens HausgerUte fell from 16.6% to 15.3%. AEG continues focusing on dish-washers, washing machines, laundry-dryers and built-in appliances of the upper price class. Main marketing channels are specialist **electronics** retailers, **furniture** stores and kitchen specialists. The **design** of products is becoming more important. Abroad, the company is to intensify business especially in eastern Europe.

INTERNATIONAL PATENT CLASS: G06F-017/50

...ABSTRACT system comprises a computer system. The computer system comprises an HD unit, which stores a **furniture design support program** and data representing the basic forms of units and parts. An operator defines a size...

...SPECIFICATION Field

The present invention relates to a system for and a method of supporting the **design** of an article, for example, **furniture**, and a medium having a **program** for supporting the design of an article stored thereon.

Background of the Invention

When furniture...out the data from the FD 22. The CD-ROM drive 15 reads out a **furniture design support program** and data (a master file) from a CD-ROM 21. The HD unit 16 writes the **furniture design support program** and various types of data into a hard disk (HD), and reads out the program...

...the printing of the results of the processing are made by the printer 17.

The **furniture design support program** and the data (including the master file) required to operate the computer system as the furniture design support system are recorded on the CD-ROM 21. The **furniture design support program** and the data which are stored in the CD-ROM 21 are read by the...

...displayed on the display screen of the display device 11 are based on both the **furniture design support program** and the data which are installed in the HD, and the OS.

Furniture design data...

...the units, the parts, the attributes, described above.

The basic information table, together with the **furniture design support program**, is stored in the CD-ROM 21, and is installed in the HD in the...the procedure for processing in the furniture design support system.

The processing operation of the **furniture design support system**

conforms to the **furniture design support program** stored in the HD in the HD unit 6. When an operator of the furniture design support system uses the mouse 13 to start the **furniture design support program** stored in the HD, the **furniture design support program** is read out of the HD, and is executed by the computer 20. Figs. 37...

...window displayed on the display screen of the display device 11 in accordance with the **furniture design support program** .

When the **furniture design support program** is started, a main menu window W1 is displayed on the display screen of the...

...will be described later.

When the "system terminate" button is clicked, all processing of the **furniture design support program** is terminated (step 36).

3.2 Unit/part definition processing

Fig. 26 is a flow...a format that data input is successively advanced in response to a question from the **furniture design support program**). Of course, one window for the data input may be displayed on the display screen...

...depth and the height of a cell formed by the unit are calculated by the **furniture design support program** in consideration of the type classification 1 of the unit selected in the step 42...

...flow chart showing an example of the board thickness determination processing (step 47) by the **furniture design support program** in detail.

Data related to a material such as wood composing a unit which is...

...larger than the board thickness used for the unit of a small size. In the **furniture design support program** , a calculation rule for calculating a board thickness on the basis of data representing the type ...of the unit which are entered by the operator, the board thickness, determined by the **furniture design support program** , the sizes of the top board, the baseplate, and the side boards which are calculated by the **furniture design support program** , and the size of the cell. This is a case of a side board covering...

...of the cell

The size in the height direction (cH) of the cell

In the **furniture design support program** , with respect to a side board covering type unit II, a side board covering type...

...the unit which is entered by the operator and the board thickness determined by the **furniture design support program** are substituted in an equation corresponding to the selected unit type, so that the sizes ...

...baseplate, and the side boards and the size of the cell are calculated by the **furniture design support program** . Data representing the calculated size is temporarily stored in the memory 18.

When data indicating...be displayed in the assembled furniture display area B2 by a program (e.g., CAD **software**) other than the **furniture design support program** .

When the unit is displayed in the assembled furniture display area B2, a branch number...parting board is stored therein. The thickness of the parting board is determined by the **furniture design support program** on the basis of the size of the unit. Of course, it may be a...to each of the parts, and stores data representing the size of the part.

The **furniture design support program** performs rendering

processing for generating three-dimensional drawing data (data representing the coordinates of a...

...display screen of the display device 11.
 When "front view" is selected (step 112), the **furniture design support program** displays a front view of the completed furniture in the completed furniture drawing display area...

...114). Similarly, when "plan view", "rear view", and "side view" are selected (step 112), the **furniture design support program** displays a plan view, a rear view, and a right side view of the completed...

...rendering processing (see Figs. 11 and 12).
 When "cell view" is selected (step 112), the **furniture design support program** displays in the completed furniture drawing display area C2 a front view of the furniture...

...are removed from the completed furniture.
 When "detailed front view" is selected (step 112), the **furniture design support program** displays in the completed furniture drawing display area C2 an image obtained by shading the...

...view (or a perspective view) of the completed furniture.
 When "member table" is selected, the **furniture design support program** displays in the completed furniture drawing display area C2 a material used for the completed...

...the kind of wood used for a part, etc.).
 When "cutout view" is selected, the **furniture design support program** calculates the size of wood required to manufacture a unit, a drawer, etc. constituting the...

...efficiently (such that the board is not uselessly left).
 When "estimation sheet" is selected, the **furniture design support program** calculates costs required to fabricate the completed furniture on the basis of the kind, the...software) can be utilized. The CAD program may be located as a part of the **furniture design support program**, or may be a **program** separate from the **furniture design support program**.

The CAD **program** generates three-dimensional drawing data (data representing the coordinates of a vertex, a side, and...

...the three-dimensional drawing data related to the completed furniture are handed to the CAD **program** from the **furniture design support program** (a 3D modeling instruction, a 3D drawing instruction, and a 3D printing instruction). The CAD...

...seen in a two-dimensional image on the basis of the data delivered from the **furniture design support program**, to generate three-dimensional drawing data (modeling). Further, the CAD program includes a drawing function...production processing may be positioned as a part of the function of the above-mentioned **furniture design support program**, or may be a **program** different (separate) from the **furniture design support program**. When the **program** for the processing drawing production processing is a **program** different (separate) from the **furniture design support program**, the **program** for the processing drawing production processing is for performing processing for producing the processing drawing in accordance with **furniture design** data produced using the **furniture design support program** and data in the table storing the data for producing the processing drawing. The produced

...

...each of the joint members is arranged is previously determined in the data table. The **furniture design support program** (or the **program** for the processing drawing production processing) may be caused to make such judgment that the...processing can be also positioned as a part of the function of the above-mentioned **furniture design support program**, or can be also positioned as the function of a separate **program** which operates utilizing **furniture design** data produced by the **furniture design** support system. In this case, a program for the manufacturing process drawing production processing is...production processing can be positioned as a part of the function of the above-mentioned **furniture design support program**, or can be also positioned as a separate **program** which is operated utilizing the **furniture design** data produced by the **furniture design** support system. In this case, a program for the instruction manual production processing is previously...

...or is printed out.

8 Furniture design support system utilizing network

In the above-mentioned **furniture design** support system, a **furniture design support program** installed in the computer system and various types of tables are used, for an operator...introduction window (HTML data) are recorded.

A part or the whole of the above-mentioned **furniture design support program** may be recorded on the CD-ROM 304. In this case, the **furniture design support program** recorded on the CD-ROM 304 is installed in the client computer 303, so that...

...Figs. 8, 92, and 98) in a stand-alone manner. When a part of the **furniture design support program** is recorded, the client computer 303 executes only a part of the function of the...
